## InTest Recognized for Excellence by Texas Instruments

April 15, 2025 at 2:15 PM EDT

MT. LAUREL, N.J.--(BUSINESS WIRE)--Apr. 15, 2025-- [InTest Corporation](#) (NYSE American: INTT), a global supplier of innovative test and process technology solutions for use in manufacturing and testing in key target markets which include semiconductor ("semi"), automotive/EV, defense/aerospace, industrial, life sciences and safety/security, today announced that InTest EMS, a business in the Electronic Test division of InTest Corporation, received the Texas Instruments ("TI") 2024 Supplier Excellence Award. This annual award recognizes suppliers who demonstrate dedication and commitment to providing products and services that consistently meet TI's high standards for excellence.

"The TI Supplier Excellence Award is a testament to our unwavering commitment to quality, innovation, and customer satisfaction," stated Electronic Test Division President Joe McManus. "Our entire team's dedication to delivering quality products and support has been instrumental in this recognition and we remain dedicated to striving for excellence in all aspects of our operations."

InTest EMS has been distinguished by TI as part of an elite group of suppliers recognized for their exemplary performance in the areas of cost, environmental and social responsibility, technology, responsiveness, assurance of supply, and quality. Its solutions are designed to assure testing accuracy, improve efficiency, and reduce downtime. The business has demonstrated exceptional commitment to innovation and collaboration with its manipulator, docking and wafer probe equipment solutions.

### About InTest Corporation and InTest EMS

InTest Corporation is a global supplier of innovative test and process technology solutions for use in manufacturing and testing in key target markets including both the front-end and back-end of the semiconductor manufacturing industry ("semi"), automotive/EV, defense/aerospace, industrial, life sciences and safety/security. InTest Electronic Test, through InTest EMS, designs, manufactures, and markets solutions including test head manipulators, docking hardware, and test interfaces that are used by semiconductor manufacturers to test integrated circuits and wafers.
